Declaration of Compliance

Balon Stock No.: 1/2F-F03N-SE

A.O. No.: 13885

Build Date: 12/2025

Raw Material Origin

Part	Material Grade or Specification	Raw Material Supplier Location
BODY	ASTM A350, LF2 CL1	OHIO, USA
ADAPTER	ASTM A350, LF2 CL1	OHIO, USA
STEM	ASTM A479 316	ILLINOIS, USA
BALL	ASTM A479 316	PENNSYLVANIA, USA
SEAT	Nylon 11	PENNSYLVANIA, USA

Balon declares each component described above conforms to the revision or version of the referenced material specification in effect at the date of manufacture, including mechanical properties. Balon also declares that all machining operations are performed by Balon in its Oklahoma City manufacturing facility.

General Valve Information

1/2" Full Port S.E. 3,000# WP Steel Ball Valve 316 S.S. Ball & Stem, NACE			
Pipe Size	0.5	Min Temp F° / C°	-20 / -29
Port Type	Full	Max Temp F° / C°	212 / 100
Class or MAWP	W.P. 3000	NACE Compliant	Yes
End Connection	Screwed	Option(s)	

Scope of Industry Compliance

Balon certifies the valve(s) referenced in this Declaration of Compliance meet the order requirements provided to Balon. Customer specified modifications or test methods are noted in the Option(s) area of this certificate. Balon further declares:

All Balon products are produced in the United States and meet or exceed the requirements of Buy American Act of 1933, the Buy America provisions of the Surface Transportation Assistance Act of 1982, and the Buy American provisions of the American Recovery and Reinvestment Act of 2009, the AIS Requirements mandated by Section 746 of Title VII of the Consolidated Appropriations Act of 2017, and the Build America, Buy America Act Requirements under Title IX of the Infrastructure Investment and Jobs Act, Pub. L. 177-58, including the requirements of (i) 49 U.S.C. §5323(j)(1) and the applicable regulations in 49 CFR Part 661, (ii) 23 U.S.C. §313 and the applicable regulations in 23 CFR Part 635, and (iii) 41 U.S.C. §8302 and the applicable regulations in 2 CFR Part 184.

Balon is an API 6D licensed manufacturer. Annually, API certifies Balon's Quality Management System (QMS) complies with API Specification Q1, and an independent registrar certifies Balon's QMS complies with the European Pressure Equipment Directive (PED). Balon designs and manufactures all of its products per this QMS.

All Balon valves are designed in compliance with ASME B16.34, including the provisions governing the design of pressure containing parts, the use of pressure boundary bolting, and applicable pressure-temperature ratings. Balon has applied the design principles of B16.34 for the valves it manufactures from other materials, such as 60-40-18 ductile iron and 955 nickel aluminum bronze. All flanged-end ball valves and check valves, all weld x weld and weld x flanged-end ball valves, and all API pattern wafer check valves also meet the design requirements of API Standard 6D.

Independent laboratories have tested the required number of Balon valves to certify, where applicable, all Balon ball valves from 1/4" to 12": (i) exceed the fire safety requirements of API Standard 6FA, and (ii) outperform the requirements of API Standard 641 for certification as Low Emission valves. Balon further certifies that no manufacturing, design, or material defect will cause such valves to emit fugitives at greater than 100 ppm in the first five years.

All Balon valves marked "NACE" meet the material and manufacturing requirements, including any applicable welding and heat-treat requirements, of ANSI/NACE MR0175-2021 Region 3, ISO 15156-2:2020, and ISO 15156-3:2020.

Each reference to a statute, executive order, or regulation in this Declaration refers to the revision or version in effect on the date of manufacture. A chart listing the effective dates of the industry codes, specifications, and standards governing the design or performance of valves that are referenced in this Declaration is available at <http://www.balon.com/StandardsChart>.
